## PRESS RELEASE

### **Integral's FX Yield Manager™ Awarded Prestigious e-FX Initiative of the Year Award by FX Week**

**PALO ALTO, Calif. (July 11, 2016)** — Integral Development Corp. ([www.integral.com](http://www.integral.com)), the technology partner trusted by leading banks, brokers, and investment managers to design, deliver and grow their FX businesses, today was awarded the prestigious e-FX Initiative of the Year by FX Week, one of the leading publications covering global FX markets. The award was given to Integral's [FX Yield Manager™](#), the most advanced internalization engine available today. It is the core risk management component included in FXCloud, the industry's most flexible and reliable trading platform. Seamlessly integrated with [OCX RiskNet™](#), Integral's newly released mid-point matching engine, FX Yield Manager allows firms to automatically and continuously offset their risk positions with natural, opposite interest at the Integral FX Benchmark midrate.

FX Yield Manager automates, manages and monitors the risk and yield of complex FX businesses. Features include segmenting client flow, customization of risk management policies such as internalization of customer order flow, auto-skewing of price-maker streams based on inventory size, and auto-hedging of warehouses once maximum risk limits are reached.

"We are extremely pleased that FX Week has recognized the innovation in FX Yield Manager," said Harpal Sandhu, CEO, Integral Development Corp. "Now our BankFX and MarginFX customers know that theirs is the most advanced internalization engine in the market. When combined with OCX RiskNet to automatically offset their warehouse positions against opposing interest, they maximize their yield and grow their FX businesses."
