

FX Inside Professional™ private FX trading system for Spot, Outrights and Swaps

A direct market access FX system that combines pricing from your liquidity providers with algorithmic trading to give you maximum liquidity and best execution

FX Inside Professional eliminates the need for viewing multiple FX applications on multiple screens by consolidating them into a single interface under your institution's brand.

Traders see your complete list of market makers with their associated price streams, giving you full visibility and transparency of your liquidity. Trade global currency pairs as well as gold and silver.

FX Inside Professional algorithmically sorts and ranks prices giving you the best price for any trade size with real-time execution of large trades over multiple liquidity providers and their pricing tiers.

Three methods are supported for receiving prices and executing trades, Executable Streaming Prices (ESP), Request for Stream (RFS) and undisclosed (or displayed) orders.

STP allows executed FX trades to automatically flow into your back office regardless of liquidity provider.

With FX Inside Professional You:

- Maximise Profitability
- Increase Efficiency
- Reduce Execution & Operations Risk

Benefits

Best Price-Best Execution

FX Inside Professional algorithmically aggregates and ranks prices from your liquidity providers, giving you depth of liquidity and best price, so you can achieve best execution.

Depth and Quality of Liquidity

Liquidity is consolidated and displayed with bad, stale, and latent prices filtered out.

Transparency

View your trading relationships with full visibility and transparency, consolidated on one screen.

Large Trades

FX Inside Professional's algorithmic capabilities support executing large trades across multiple liquidity providers and their price tiers.

Size of large trades can be undisclosed keeping your interest private and supporting best pricing from your liquidity providers.

Single Configurable Interface

An intuitive, highly-configurable user interface provides flexibility in displaying all your liquidity providers with their multi-tier prices by currency pair, size, and provider on one screen.

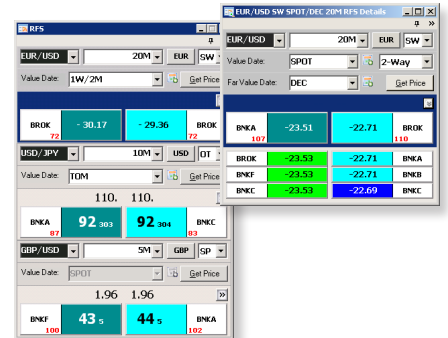

Arrange and customize dealing panels to suit your requirements. Any panel can be torn off to be viewed on any monitor on your desktop.

Powerful Trading Algorithms

Multiple trading modes, sophisticated order-crossing logic, and powerful configuration options for ESP, RFS and undisclosed or displayed orders, gives you complete control over your dealing activity.

Request for Stream

Request for stream for spot, outright, or swap trades can provide access to more currency pairs and better prices for larger sizes.

Request for Stream
RFS Price and RFS Price Details Panels

Trade Completion

The FX Grid® low latency network increases the probability of filling and execute an order, and reduces rejection rates from liquidity providers due to delays. You can submit orders and execute your trades in real time.

Single STP

STP is available via RTNS, Traiana, and Integral's STP client.

Ease of Deployment

Integral's solutions and services are delivered On Demand so that you can quickly go live without having to set up, own and operate a costly IT infrastructure. No software to install, no migrations to plan.

FX Inside Professional Workspace
Main workspace and Deal Blotter

Features

Price Discovery

ESP Price Details Panel

Shows bid/offer prices sorted and ranked and depth of book. Fractional pips show prices with a high degree of precision.

ESP Prices Panel

Lists the best bid/offer prices for currency pairs and gold or silver, according to best price, price at depth or VWAP.

RFS Price Details Panel

Shows the full depth of book and expiry periods for a specific currency pair.

- Rates from multiple liquidity providers are displayed for a single request.

RFS Price Panels

Lists the best price and expiry time for an RFS price stream.

- See the result of multiple simultaneous RFS streams on a single panel.
- Display best bid and best offer.

Orders Panel

Order types include limit, market, stop and trailing stop. Enter orders as undisclosed or display orders to be offered and matched by your counterparties.

Trade Execution Options

Market Order

Execute at market price.

Immediate or Cancel (IOC)

Any portions not immediately executed are automatically cancelled.

Work the Balance

Automatically execute orders at a selected price as rate updates are available for a remaining balance.

Icebergs

Select a partial amount of a total desired trade to be displayed to counterparties.

VWAP (Volume Weighted Average Price)

Execute orders keeping the average execution price at or better than a specified value.

Order Expiry Options

- GTT (Good-til-Time)
- GTC (Good-til-Cancel)

Trade Entry Options

- Single click or double click on a price.
- Quick order entry buttons from a price ladder drop down.
- Manual entry of order in orders panel.
- Click on a price to accept an RFS offer.
- Use the optional custom keypad for dealer keystroke efficiency. Designed with industry standard specifications, the programmable keypad occupies a minimal footprint.

Reporting and Monitoring

Account Details

Shows credit and P&L status.

Monitors Panel

A single panel shows all orders, positions, deals, messages and exceptions with appropriate dates, times, and amounts. The panel can be searched, downloaded, and printed.

The image shows two screenshots of the 'FX Inside - Monitors' software interface. The top screenshot displays a table with columns for Order ID, Deal ID, Status, Dealer, Type, Buy/Sell, Ccy Pair, Deal A, Deal C, Limit, Fill Ra, and Filled A. It lists various orders for currency pairs like EUR/USD and USD/JPY. The bottom screenshot shows a summary table with columns for Ccy Pair, Deal ID, Position, Buy, Open Amount, Position Rate, Net Buy Amount, Avg Buy Rate, Net Sell Amount, and Avg Sell Rate. It provides a high-level overview of the trading activity.

Monitor Panels

Orders Blotter and Positions Manager

A Market Snapshot

Shows all prices at the time of the trade.

Reports

Reports can be created by currency pair, counterparty, dealer, date and other custom variables.

Multiple Collaborative Views

Other members of the trading desk, such as the chief dealer, can see all activity and status for all the institution's traders.

Post-Trade Processing

One STP – Many Banks

STP is available via RTNS, Traiana, and Integral's STP client.

When prime brokerage integration is required, FX Inside Professional can integrate seamlessly with your existing prime brokers.

FX Software-as-a-Service

FX Inside Professional is an On Demand service on Integral's FX Grid, a global inter-institutional connectivity and trading network linking leading market making banks to FX market participants.
