

# Integral MetaTrader 4 Bridge

Connecting the MetaTrader 4 trading platform to FX Grid and FX Inside White Label solutions. Autodeal with one or multiple liquidity providers.

FX Grid® multi-source liquidity is now accessible to brokers operating MetaQuotes MetaTrader 4 retail platforms. Multiple liquidity providers can be aggregated into a single MetaTrader 4 system.

The bridge allows a broker to automatically submit trade requests to the liquidity provider of choice and wait for a confirmation prior to sending an accept or reject message to the broker's client.

In combination with FX Inside White Label solutions brokers can create unique price streams from aggregated liquidity with sophisticated control over liquidity sources, pricing model, execution model, and risk management. See the FX Inside White Label datasheet.

## Benefits

### Best Liquidity

Using the FX Inside White Label MetaTrader 4 Bridge, retail brokers can access liquidity from any of their counterparties on the FX Grid providing access to more price feeds, resulting in better pricing and depth of liquidity.

### Market Risk Management

Brokers can configure autodealing to offset all, some, or no market risk with their liquidity providers. FX Inside White Label can be used to manage and offset risk by using its algorithmic trading facilities.

### High Availability

FX Inside White Label MetaTrader 4 Bridge allows brokers access to multiple liquidity providers giving them a more consistent and robust price feed and not relying on a single provider.

### Back Office Integration

Trades done with liquidity providers can be sent directly to a prime broker using pre-established FX Grid STP links.

Brokers may also use FX Inside White Label to roll their open positions with one or more liquidity providers using FX Grid. The rolls are also sent to the broker's prime broker via STP.

## Features

### FX White Label MetaTrader 4 bridge:

- Provides a connection to the broker's liquidity provider
- Supports multiple bridges on a single MT4 Server
- Full logs of all transactions for security
- Full reporting of the entire bridge trading activity
- Scheduled tasks (connect/disconnect, reporting, etc.)

### Business Support Services

- 24 x 7 support
- Staffed with FX-knowledgeable business specialists
- Training and implementation services

## FX Grid®

FX Grid is Integral's global inter-institutional connectivity and trading network, linking the world's leading market making banks and liquidity providers to financial institutions.

Whether you are an institution, bank or broker, the FX Grid gives you direct access to all your liquidity providers for best liquidity. FX White Label trading solutions via the FX Grid are delivered as set of managed services providing ultimate flexibility to manage and grow your FX trading business.

## FX Inside White Label

FX Inside White Label private trading solutions are managed service trading systems that allow you to source, package, and deliver your liquidity, directly to your clients under your brand.

FX Inside White Label gives you the flexibility to configure your own trading system including liquidity sources, pricing model, execution model, risk management, and the clients user experience.
