

PRESS RELEASE

Integral's successful integration of buy-side systems into global Electronic Communication Network (ECN) drives robust average daily volumes

Average daily volumes (ADV) across Integral platforms totaled \$35.0 billion

PALO ALTO, California (May 2, 2018) – Integral (www.integral.com), the technology partner trusted by leading banks, brokers, and asset managers to help them outperform their competition in the foreign exchange market, reported today record consolidated FX volume following the successful integration of numerous buy-side systems into Integral's OCX ECN. Average daily volumes (ADV) across Integral platforms totaled \$35.0 billion in April 2018. This total reflects single count trading volumes originating from BankFX™, MarginFX™, InvestorFX™, and Integral MTF™ in all transaction types, including spot, forwards, and swaps.

No other platform reaches as many, as varied, and as comprehensive a set of FX products and participants as OCX. Banks brokers and asset managers now share direct access to OCX for disclosed, undisclosed and order-book trading.

“Integral continues to advance its platform to meet significant new regulatory requirements,” said **Harpal Sandhu, CEO of Integral**. “In the process, we have worked closely with our customers to integrate their systems, and as a result they have consolidated trading over OCX, the most reliable yet flexible trading network available in the FX market.”

OCX is directly cross connected with more than 250 liquidity sources supplying more than 3,000 market making streams in NY4, LD4, and TY3. OCX's award-winning advanced market design delivers the ultimate in execution performance by combining resting limit orders, market-making streams, and midpoint interest in a single integrated high-performance venue.

About Integral

Integral is a financial technology company that helps its customers—banks, brokers, and asset managers—outperform their competition in the foreign exchange market through innovative solutions for workflow management and advanced execution. This powerful cloud-based platform is the industry's only answer for FX institutions that want to design and deliver complete solutions tailored to their businesses. Integral's modern approach of addressing the entire FX lifecycle with an intelligent platform allows its customers to achieve the lowest transaction costs, greatest operational efficiency, and highest yield. Founded in 1993, Integral maintains development, support, and sales offices in Palo Alto, New York, London, Tokyo, Singapore and Bangalore.
